

## **RESOLUTION URGING PUBLIC OFFICIALS AND ELECTED LEADERS TO ACKNOWLEDGE THE VALUE OF CLEAN WATER TO VERMONT'S PUBLIC AND ECONOMIC HEALTH AND TO SUSTAINABLY INVEST IN THE SAME**

WHEREAS, clean water is essential to Vermonters' personal health and the health of our economy and Vermont's environment; and

WHEREAS, clean water is critical to ensure healthy habitats vital to the protection and restoration of indigenous species and the protection of all flora and fauna throughout the food web; and

WHEREAS, significant progress to restore and protect our water resources has been made since the passage of the Clean Water Act and Safe Drinking Water Act; and

WHEREAS, compromised and impaired waters still exist, and unimpaired waters remain largely unprotected, threatening our quality of life and our economy while public sector investment in protecting water quality continues to shrink, leaving forty years of environmental gains since the passage of the Clean Water Act hanging in the balance; and

WHEREAS, protecting the Vermont brand built on a reputation for protecting its unsurpassed environmental health from degradation is essential for the continued success of all business sectors relying on this crucial market distinction; and

WHEREAS, outdoor recreation, in particular water-based recreation, is a vital aspect of our state identity and a major pursuit among Vermonters and visitors, alike; and

WHEREAS, polluted waters are not accessible waters, do not support aquatic life, and, worse, imperil public health; and

WHEREAS, outdated treatment technologies, aging pipes and pumps, and inadequate capacity undermine our ability to treat sewage, stormwater, and drinking water; and

WHEREAS, in the opinion of leading professionals within numerous disciplines, infrastructure is inadequately funded in Vermont to meet current and future requirements; and

WHEREAS, new and sustained public investment for clean water at the federal, state, and municipal levels is critical to protect this basic element of public health and a vibrant, sustainable economy; and

WHEREAS, it is our legal and moral obligation, as well as an ethical imperative, to ensure that the same quality of life enjoyed by the current generation is possible for the next.

NOW, THEREFORE, BE IT RESOLVED that the undersigned concerned citizens and organizations urge that our state and local elected officials and policymakers:

1. Expediently adopt new, equitable, targeted fees and dedicated, broad-based revenue mechanisms; and
2. Sustainably invest these revenues statewide into water, wastewater, and stormwater infrastructure, and all other manner of water resources protection and water pollution remediation.

Approved and adopted the eighth day of January 2013.
